PROGRAM RELATED SKILLS

Motivated cybersecurity Analyst with a strong academic background (GPA 3.9) and hands-on experience in log analysis, risk identification, pentesting and policy-based threat response., I'm eager to support organizations in strengthening compliance, digital risk governance, and security frameworks.

Technical Skills:

- **Security Frameworks & Compliance:** PIPEDA, ITSG-33, NIST 800-53/800-171, OWASP, MITRE ATT&CK, CIA Triad
- **Security Operations & Tools:** Splunk, OSSIM, Nessus, Wireshark, IDS/IPS, Microsoft 365 Security, NG Firewall, Metasploit, Kali Linux
- **Cryptography & PKI:** Encryption standards, SSL/TLS, digital signatures, x.509 certificates, Public Key Infrastructure (PKI)
- **Automation & Scripting:** Python (automation tasks, log parsing), PowerShell, Bash
- **Systems & Networks:** Linux (Ubuntu, Kali), Windows Server, basic Cisco networking
- **Programming & Web:** Java (Servlet, JSF, Spring, Hibernate, REST APIs), Python, JavaScript, Angular (PrimeNG), PHP, HTML/CSS
- **Database Management:** SQL (MySQL, PostgreSQL, Oracle, MS SQL Server, MS Access)
- **Reporting & Collaboration:** Experience writing risk assessments, analyzing security reports, and collaborating across departments

Languages:

Bilingual fluent in English, native in French.

EDUCATION

Cyber Security Analysis

GPA 3.9/4

ALGONQUIN COLLEGE – OTTAWA – ON
September 2024 – April 2025

Computer Programming Diploma

GPA 3.95/4

ALGONQUIN COLLEGE – OTTAWA – ON
September 2023

PROFESSIONAL EXPERIENCE

Internship Web Developer

July 2023 – March 2024

YRG Engineering Paris France

- The Inventory Management project involved my responsibility for the development of an inventory export and import feature.
- Solution Development: I spearheaded the implementation of a method for exporting and importing

inventory data, considering specific file formats, stringent security requirements, and intricate inventory management regulations.

- Testing and Validation: I conducted rigorous testing across various scenarios to ensure the flawless performance of the solution, while aligning it with end-user requirements.

Epidemiology Investigation and Research Officer

Feb 2021 - Apr 2022

Public Health Montréal, Montréal, Québec

- Served as an Epidemiology Investigation and Research Officer, conducting comprehensive research and investigations into disease outbreaks, public health risks, and other epidemiological issues.
- Promoted to the role of Special Cases Investigation and Research Officer responsible for investigating and solving complex cases, leveraging soft skills such as effective communication, teamwork, and problem-solving.
- Collaborated with various stakeholders, including health officials and government agencies.

French Trainer for the Public Service

Sep 2019 - Dec 2020

Ecole Learn2lang, Ottawa, Ontario

- Develop and implement lesson plans that align with provincial language curriculum standards
- Deliver engaging and effective French language instruction to students of various levels and age

ACADEMIC PROJECTS

Incident Response & Threat Hunting

- Investigated Indicators of Compromise (IOCs) in the most common OWASP Top vulnerabilities (e.g., SQLi, CSRF, IDOR, XSS, XSS and Broken Access Control) using Wireshark, Kibana, and Security Onion.
- Analyzed Sysmon & Windows Event Logs to trace attacker activities, including privilege escalation, lateral movement, and data exfiltration.
- Analyzed phishing emails for malicious payloads and social engineering tactics.

Penetration Testing & Exploitation

- Performed Linux, Windows and web application penetration testing by exploiting a variety of remote code execution, misconfiguration, and authentication bypass vulnerabilities in lab environments.
- Used tools like Metasploit to simulate real-world attack chains, including privilege escalation, SMB exploitation, and post-exploitation activities.

Compliance & Frameworks

- Applied NIST 800-53, ITSG-33, and PIPEDA principles to assess risks and recommend policy-based mitigations in simulated enterprise scenarios.
- Analyzed phishing emails for malicious payloads and social engineering tactics.

Email & Data Protection Assessment

- Evaluated phishing vectors, weak encryption, and access misconfigurations, producing summary reports with remediation recommendations.

CERTIFICATIONS

- Agile at work (Building Your Agile Team) (2023)
- Certification en Effective communication – Dale Carnegie International.
